## PROFILE

Aspiring Database Administrator developing skills in database management, performance optimization, and data security, with a focus on Oracle and SQL Server databases. Committed to mastering SQL queries, enhancing database performance, and delivering effective client support. Passionate about web development, especially React.js and modern technologies, dedicated to creating user-friendly web applications for an enhanced user experience.

## WORK EXPERIENCE

**Associate Database Administrator | Feb 2024 - currently**  
**Forman Christian College**

- Optimize and maintain SQL Server (2005-2019) and Oracle (11g-21c) environments, ensuring effective backup and patch management.
- Execute data migrations and ensure integrity during transitions, assisting with server updates.
- Develop documentation for data standards and metadata to support application development.
- Collaborate with the ERP team on SQL query design and report building using Toad, SQL Loader, PowerBI, Crystal reports.
- Manage VMware and Linux environments, supporting application deployments and system performance.

## PERSONAL PROJECTS

**Web Development | Feb 2022 - Apr 2022**  
**JaniMotors**

- Collaborated on frontend development of a car buying and selling website.
- Utilized MERN stack for seamless integration and key features implementation.

**Web Development | Sept 2021 - Oct 2021**  
**Shelbey Brothers**

- Built a user-friendly BPO company website from scratch using HTML, CSS, JavaScript, and React.js.

**E-commerce Store**

- Developed a React.js-based e-commerce store with product listings, cart functionality, and user authentication.

**FITNETIC (FYP) | Sept 2022 - Dec 2022**

- Led frontend development of a fitness business website, enabling direct client-trainer interaction and premium services.
